## Synopsis Books:

Humanity stands on the brink. Again.

Surviving the Syndrome meant genetically modifying almost every person on the planet. But norms and gems are different. Gems may have the superpowers that once made them valuable commodities, but they also have more than their share of the disabled, the violent and the psychotic.

After a century of servitude, freedom has come at last for the gems, and not everyones happy about it. The gemtechs want to turn them back into property. The godgangs want them dead. The norm majority is scared and suspicious, and doesnt know what it wants.

Eli Walker is the scientist charged with deciding whether gems are truly human, and as extremists on both sides raise the stakes, the conflict descends into violence. Hes running out of time, and with advanced prototypes on the loose, not everyone is who or what they seem. Torn between the intrigues of ruthless executive Zavcka Klist and brilliant, badly deformed gem leader Aryel Morningstar, Eli finds himself searching for a truth that might stop a war.
