Synopsis Books:

The President of Claritiva Software is kidnapped at gunpoint. FBI Special Agent Cliff Knowles is the first to respond when the crime is reported. But the report is suspicious in many ways and the front office is skeptical the kidnapping is real. Knowles must fight his own bureaucracy while trying to rescue the victim and catch the kidnappers. This gripping novel will have you on the edge of your chair from the first chapter.

The author, a retired 25-year FBI veteran Special Agent, draws heavily on his experiences working high-technology and violent crimes cases in Silicon Valley to provide an unprecedentedly candid look at what it is like to work a high-profile kidnap case and what a kidnapping victim experiences. If you have considered becoming an FBI agent, or you have wondered what you would face as a kidnap victim and the decisions you would have to make, this book is a must-read. This is the real story, not the TV version you've seen a thousand times. It isn't always pretty, but it is what happens when lives are at stake.
