## Synopsis Books:

As a young boy, Neil Armstrong had a recurring dream in which he held his breath and floated high in the sky. He spent his free time reading stacks of flying magazines, building model airplanes, and staring through a homemade telescope. As a teenager, Neil worked odd jobs to pay for flying lessons at a nearby airport. He earned his student pilots license on his sixteenth birthday. But who was to know that this shy boy, who also loved books and music, would become the first person to set foot on the moon, on July 20, 1969.
