Synopsis Books:

For every golfer who wants to drive the ball farther down the fairway, the X-Factor will show them how. Jim McLean's phenomenal discovery of the secret to added distance has been the featured cover story of a bestselling issue of "Golf" magazine, the subject of a bestselling video, "X-Factor, " and has been integral to the raging success of the Jim McLean Golf Schools across the country.

Jim McLean's theory is that it isn't how much a golfer turns, but how much the shoulders turn in relation to the turn of the hips, that creates the power behind a swing. He introduced his theory to a sports specialist who tested it out on pros like John Daly using a Sportsense Swing Motion Trainer (SMT)-a high-tech swing analysis machine which revealed that the differential between the turn of the shoulders and the turn of the hips creates the torque and the power in the golfer's drive. With "The X-Factor Swing, " McLean will teach the average golfer how to drive the ball like the pros.
